

#### LINEAR REGRESSION EQUATION

$$W \text{ ICP-MS, in } \mu\text{g/L} = .031 + .874 * W \text{ clCP-MS, in } \mu\text{g/L}; R^2 = 1$$

#### Confidence Intervals W ICP-MS, in µg/L vs. W clCP-MS, in µg/L

	Coefficient	95% Lower	95% Upper
Intercept	.031	-.013	.076
W clCP-MS, in µg/L	.874	.873	.876
